SYSTEM SOLUTIONS PROS / A REQUEST TO JOIN THE TEAM

Website and Office Support

I'd like to join your team in a paid role helping with the website and day-to-day office work. I'm new to the electrical business, so I'd start by learning how you already work and asking a lot of questions. I'd take on more only as I earn it.

Where I could help first

- Draft clearer website wording for you to check and approve.
- Turn approved project photos and details into short project stories.
- Adjust messages, checklists, and records to fit how you already work.
- Keep a simple list of what's done, what's waiting, and what's next.

How I'd go about it

- Learn what already works before suggesting changes.
- Ask when I don't know something, rather than guess.
- Do what I said I'd do, and keep you posted.
- Leave every decision about customers, pricing, and the website to you.

My first 90 days

First 30 days	**Learn first.** Learn your services, how customers reach you, and who decides what. Aim to deliver a sheet of company facts for you to check, suggested homepage wording, and one draft service page.
Days 31–60	**Take on regular tasks.** Handle two regular tasks you choose, such as keeping the website current or following up on paperwork. Adjust a few templates to how you work, if they're useful.

Days 61–90	**Decide together.** Keep the regular tasks going, write short how-to notes so anyone could pick them up, and talk about whether this is a good fit for both of us.

How we’d know if it’s working

At 30, 60, and 90 days we’d look at simple questions: Did I get things done? Was the work accurate and useful? Did I communicate well? Your honest feedback would decide what happens next.

What I’m asking for

A paid role with a small starting scope, agreed hours, and check-ins at 30, 60, and 90 days. I’m happy to start with the basics, and we’d agree pay based on the work you’d like me to do.

This is just a starting point for discussion. Everything here can change to fit your schedule and priorities. You’d decide what gets published, what I can access, and anything promised to customers.
