Prepared for the owners of System Solutions Pros · November 2026

Website notes, and a request to join your team

I read your public website carefully and wrote down what I noticed. I'd also like to ask for a paid role helping with the website and the office.

A note before you read: I'm new to the electrical business. I wrote this from the public website only. I don't know your customers, your history, or why things are set up the way they are. Please read everything here as questions and ideas, not as instructions.

What's inside

1. What I'm asking for
2. My first 90 days
3. Seven things I noticed on your website
4. One idea for the top of your homepage
5. 38 ideas, if you ever want them
6. Office templates you can use or ignore
7. Questions for you

PART 1

What I’m asking for

A paid role helping with the website and day-to-day office work. I’d start by learning how you already work and asking a lot of questions. I’d take on more only as I earn it.

Where I could help first

- Draft clearer website wording for you to check and approve.
- Turn project photos you approve into short project stories.
- Adjust messages and checklists to fit how you already work.
- Keep a simple list of what’s done, what’s waiting, and what’s next.

How I’d go about it

- Learn what already works before suggesting changes.
- Ask when I don’t know something, rather than guess.
- Do what I said I’d do, and keep you posted.
- Leave every decision about customers, pricing, and the website to you.

We’d agree on hours and pay based on the work you’d like me to do, and check in at 30, 60, and 90 days.

PART 2

My first 90 days

Mostly learning, with some useful work along the way. All of this can change to fit your hours and priorities.

Days 1–30

Learn first

Learn your services, how customers reach you, and who decides what. Draft a sheet of company facts for you to check, and suggested wording for the homepage.

At day 30 we'd ask: Is the work accurate and useful?

Days 31–60

Take on regular tasks

Handle two regular tasks you choose, such as keeping the website current or following up on paperwork.

At day 60 we'd ask: Are these tasks helping, or creating extra work?

Days 61–90

Decide together

Keep the regular tasks going and write short how-to notes so anyone could pick them up.

At day 90 we'd ask: Is this a good fit for both of us?

No surprises. If I'm stuck waiting on a fact or a decision, I'll say so early and work on something else in the meantime.

PART 3

Seven things I noticed on your website

These are things I saw on the public pages. There may be good reasons for each one. I'd simply want to ask.

1. The first headline doesn't say what you do

It reads "Licensed. Insured. Done Right." That builds trust, but a new visitor has to read further to learn what the company does.

2. The service links all go to the same page

Each service on the homepage leads to one general services page, so a visitor has to look again for the service they picked.

3. Two different project counts

The homepage says 50+ completed projects. The About page says 500+. Both may be true, for example one for the company and one for the team’s whole careers. A short label would clear it up.

4. The service area is described different ways

Some pages say Central Florida, others say statewide, and LinkedIn names a few regions. A visitor may not be sure whether you work in their area.

5. The contact form doesn’t ask where the job is

There’s no city or ZIP field, so finding out the location may take an extra phone call or email.

6. The Privacy and Terms links go back to the homepage

When I clicked them at the bottom of the page, they returned to Home instead of opening those pages.

7. A few small typos

For example, “Industry Experiance” and “across throughout Florida.” These are quick to fix.

I also noticed one online business directory (SignalHire) lists a different phone number from your website. The directory may simply be out of date.

PART 4

One idea for the top of your homepage

This is only a suggestion to react to. You know how you want the company described.

TODAY

Licensed. Insured. Done Right.

ONE IDEA

Electrical and low-voltage systems for businesses and homes.

“Licensed and insured” would still be on the page, just underneath, as support for the headline.

Then, three clear starting points

Commercial and industrial
Build-outs, new construction, and service upgrades.

Low voltage and building systems
Cabling, access control, cameras, and fire alarms, where you offer them.

Home electrical
Generators, panel upgrades, and EV chargers.

Each would lead to its own page, with a real photo of your work and an easy way to call or send a message. You’d choose the order and the wording.

PART 5

38 ideas, if you ever want them

These are for the longer term, and only if you want them. My first 90 days would stick to the small starting jobs we agree on.

The basics

1	Agree on one short description of what you do, and use it everywhere.
2	Keep one sheet of approved facts: project counts, license, phone, and hours.
3	Write down exactly which areas you serve.
4	Put what you do in the homepage headline.
5	Keep the menu short, with everyday words.
6	Give business, low-voltage, and home customers their own starting point.
7	Make each service link open that service.
8	Add a city or ZIP box to the contact form.
9	Make it easy to tap and call from a phone.
10	Send a test message through the form to make sure it arrives.

Helping customers decide

11 Keep the emergency number clearly separate from the estimate form.

12 Fix the Privacy and Terms links.

13 Give each type of work a short overview page.

14 Write pages for the services you most want to be known for.

15 Explain how an estimate starts and what happens next.

16 Use real photos of your work and team, with permission.

17 Show finished projects, grouped by type of work.

18 Write a few short project stories: the need, the work, the result.

19 Show where any rating or review comes from.

20 Introduce the people behind the company.

Keeping things consistent and easy to use

21 Word the license the same way on every page.

22 Add a page listing the areas you serve.

23 Answer the questions customers ask most.

24 Proofread every page.

25 Keep fonts, colors, and buttons consistent.

26 Check every page on phones and tablets.

27 Make the site easy for people with poor eyesight, or who don’t use a mouse.

28 Give each page a clear title, so Google shows what it’s about.

29 Make sure Google has the right address, hours, and phone.

30 Match your listings on other websites.

Testing and upkeep

31 Make photos load quickly.

32 Make sure old links still go somewhere useful.

33 Check how fast pages load on a phone.

34 Test the menu, buttons, and form before any change goes live.

35 Count form messages and phone taps, if your website provider can.

36 If useful, note which requests fit the work you want.

37 Compare results later against how things are now.

38 Decide who keeps each part of the website up to date.

I’m not promising more sales. The honest approach is to see how things are now, then compare later.

PART 6

Office templates you can use or ignore

I haven’t seen how your office works, so these are optional. Use anything that fits the tools you already have, and ignore the rest.

Five short message drafts

- Thanks, we got your message
- Could you send a few more details?
- Following up on your estimate
- Confirming your appointment
- Asking for an honest review

Your team would fill in the details and send them the usual way. Nothing is ever sent automatically.

Simple spreadsheets

- A list of customer requests, with who's handling each one and what's next
- Estimate follow-ups
- Approved project photos and permissions
- A record of changes made to the website
- A short monthly check-in sheet

All of them are blank, with no customer information. They're in the "office templates" download on the proposal website.

PART 7

Questions for you

Only you know the answers. These are the questions I'd bring to our first conversation.

1. **The job:** would a role like this be useful to you? If so, what should my first tasks be?
2. **Your work:** which customers and services matter most to you?
3. **Your area:** where do you work, and does it change by type of job?
4. **Your facts:** which project counts, licenses, and promises are right to show?

5. **Your photos:** which projects and photos may be shown on the website?
6. **Who decides:** who approves website changes and handles customer messages?

Where these notes come from

Your public Home, Services, About, and Contact pages, your company LinkedIn page, the Florida license record (dated September 23, 2026), and one online directory listing. I read them on November 1, 2026. I haven’t seen anything private, and nothing on your website has been changed.

Thank you for reading.

I know I have a lot to learn about your business. I’d be grateful for the chance to learn it, and to help where I can.
